

Bearded Dragon

Pogona vitticeps

CARE SHEET

www.thetdi.com

Average Size 20 - 24 inches long

Average Life Span 8 – 10 years

Diet Bearded Dragons are omnivores, although they eat mostly insects. Offer a variety of live insects including crickets, mealworms, waxworms, and cockroaches. Vegetation includes turnip greens, collard greens, mustard greens, and fruit in small amounts. **Never Feed Lettuce! It contains no nutrition, only water and cellulose.**

Feeding Feed babies twice daily. At 2 months of age you can reduce to once daily. Adults should also eat daily. Dust food with calcium powder daily & a multivitamin once a week. Feed them the amount they will eat in 10 minutes.

Housing Bearded Dragons may be kept alone or in pairs. Never house two males together in the same tank. Two females generally get along well. A male and female will likely breed if housed together.

Size - An adult must have a minimum cage size of 36" Long x 18" Deep x 16" High.

Substrate - Acceptable substrates are ground walnut shell, sand, or cage carpet. The main concern with walnut shell and sand is the possibility of compaction. If the dragon consumes large amounts of the substrate, it could cause intestinal blockage. Cage carpet is the safest option, however, it is difficult to clean easily. Ground walnut is the preferred substrate of The Tye-Dyed Iguana.

Habitat - Bearded Dragon's are from the deserts of Australia. The environment should be kept hot and dry. Provide hiding places along with flat basking surfaces.

Temperature - A Bearded Dragon's basking spot should be 95° F. The cool end of the tank can be as cool as 70° F.

Watering - Provide a bowl of fresh drinking water at all times. Bearded Dragons don't drink often, however providing a water bowl is recommended. Some keepers mist their dragons once to twice a week with a spray bottle.

Lighting - Since this is a diurnal species, it requires two light bulbs. One is the heat lamp which also emits UVA. The second is a UVB lamp. The UVB lamp will specifically say UVB on the box. If the box doesn't say UVB, its not UVB.

Plant and Fish bulbs are not UVB bulbs.
