

# Green Striped Dragon

*Japalura splendida*

## Care Sheet

### Average Size

8 - 12 inches long

### Average Lifespan

8 - 10 years

### Diet

Green Striped Dragons are insectivores. Offer a variety of live insects including crickets, mealworms, waxworms, and cockroach nymphs.

### Feeding

Feed babies and adults daily, although some keepers will feed adults every other day. Dust food with calcium powder daily & a multivitamin once a week. Feed them the amount they will eat in 10 minutes. Worms can be left in the food bowl.

### Housing

**Habitat** - Green Striped Dragons come from Southwestern China. They love to jump and climb. Provide plenty of climbing branches at various heights throughout the enclosure. Be sure to provide plenty of foliage for hiding areas in the trees. Keep the environment warm and humid. Green Striped Dragons may be kept alone or in pairs. If housed together Green Striped Dragons should be of similar size to avoid injury. Never house two males together in the same tank. Two females generally get along well. A male and female will likely breed if housed together.

**Size** - An adult must have a minimum cage size of 30" Long x 12" Deep x 12" High also known as a 20 Long. Babies can be started in a 10-gallon tank.

**Substrate** - Due to humidity requirements an absorbent substrate is desired. Peat moss, coconut fiber or Tropical Mix available at The Tye-Dyed Iguana are suitable.

**Temperature** - A Green Striped Dragon's basking spot should be 85°F. The cool end of the tank can be as cool as 70°F.

**Humidity** - The cage including the decorations should be misted 1 - 2 times a day to ensure proper humidity levels. Humidity levels should be between 70% - 80%.

**Watering** - Provide a bowl of fresh drinking water at all times. Provide a large enough water bowl so the lizard can soak.

**Lighting** - Since this is a diurnal species, it requires two light bulbs. One is the heat lamp which also emits UVA. The second is a UVB lamp. The UVB lamp will specifically say UVB on the box. If the box doesn't say UVB, it's not UVB.

**Plant and Fish bulbs are not UVB bulbs.**
